AllVideos supports 20 types of video and audio files (all web compatible), including .mp4, .flv, Quicktime (.mov, .3gp etc.) and newer "HTML5" friendly formats like .webm and .ogv. Additionally, AllVideos supports over 35 video providers, including YouTube, Vimeo, Dailymotion, SoundCloud, Flickr Video, Vine and Ustream.

Below we've embedded some example videos using AllVideos. As you'll notice, all these videos will display just fine on any type of device (desktop, tablet & smartphone).

Video on YouTube (what a song!)

{youtube}0u_g6zNuP_I{/youtube}

Video on Vimeo

{vimeo}83728153{/vimeo}

Playlist on YouTube

{youtube}https://www.youtube.com/playlist?list=PL0875C16C899A8DE6{/youtube}

Video on Dailymotion

{dailymotion}x5dbjg_2009-ducati-monster-696-monsters-in_auto{/dailymotion}

Video in MP4 format, compatible for playback on any desktop, tablet and smartphone browser, using preview image

{mp4}escapism{/mp4}

(and another one)

{mp4}snl{/mp4}

Sound clip on SoundCloud.com

{soundcloud}https://soundcloud.com/djspiller/01-spiller-urastar-feat-nina|680{/soundcloud}

Sound set on SoundCloud.com

{soundcloud}http://soundcloud.com/wichita-recordings/sets/wichita-best-of-2011{/soundcloud}

Audio in MP3 format (using a poster image)

{mp3}Frenic_Alright{/mp3}

Video on Dailymotion (using full url inside the plugin tags, instead of just the ID)

{dailymotion}http://www.dailymotion.com/video/xv3uej_ducati-hyperstrada_auto{/dailymotion}
